Commenting on the quarter, Meeka's Managing Director Tim Davidson said: *"The focus for the team during the December 2023 quarter centred on getting our high-grade Murchison Gold Project development ready. This included infill drilling around the planned oxide open pits at Turnberry and St Anne's, and submission of development approval documentation.*

Assays from this infill program confirm, and in some places expand, the broad zones of high-grade gold in the Mineral Resource. Further assays were received in January 2024 and also show broad zones of shallow oxide gold.

We expect development approval in early 2024 and are now updating our Mineral Resource and economic models in order to advance funding arrangements."

Meeka Metals Limited ("**Meeka**" or the "**Company**") is pleased to provide a summary of activities completed during the December 2023 quarter.

Murchison Gold Project (MEK 100%)

A program of infill drilling (6,410m) was completed targeting the shallow part of the Turnberry and St Anne's Mineral Resources at the transported cover to oxide interface. The drilling confirms the location and continuity of mineralisation in the areas targeted and is expected to upgrade and/or expand the Mineral Resource.

ABOUT MEEKA

Meeka Metals Limited has a portfolio of high quality 100% owned projects across Western Australia.

Murchison Gold Project

Meeka's flagship Murchison Gold Project has a combined 281km² landholding in the prolific Murchison Gold Fields and hosts a large high-grade +1.2Moz JORC Resource. The Company is actively growing these Resources while also progressing toward production. The release of the Murchison Gold Project Feasibility Study in July 2023 outlined a straightforward development strategy that delivers meaningful production and financial outcomes for the Company with recovered gold production of 663,000oz[1] over an initial 9.3 year project underpinned by a high-grade 410koz @ 3.1g/t Au Probable Ore Reserve.

The Company is now progressing all remaining environmental studies required to permit the Project and investigating opportunities to accelerate the Project development timeline through low capital options including toll milling of higher-grade starter pits and scalable processing.

Circle Valley

In addition, Meeka owns the Circle Valley Project (222km²) in the Albany-Fraser Mobile Belt (also host to the Tropicana gold mine – 3Moz past production). Gold mineralisation has been identified in four separate locations at Circle Valley and presents an exciting growth opportunity for the Company.
