December 2021 Quarterly Activity Report

- **Murchison Gold Project Scoping Study** released in December 2021 delivering a robust production and financial outcome, including:
  - Total mine production of **4.9Mt @ 2.8g/t Au for 443,000oz**
  - **8 year life of mine**
  - Average gold production of **~50,000oz per annum**
  - **72% of gold production is sourced from Measured and Indicated Resources**
  - **Pre-feasibility Study commenced** immediately (delivered in 2022)
- Phase 2 exploration drilling at the Murchison Gold Project was ongoing throughout the quarter with two drills onsite (RC and diamond drill) and approximately 10,000m of drilling completed
- Broad zone of gold mineralisation intersected at Turnberry South, including:
  - **13m @ 2.18g/t Au** (21TBRC007)
  - **8m @ 2.93g/t Au** (21TBRC002)
- Samples for 36 holes (8,200m of drill samples) targeting Turnberry and St Anne's remained at the laboratory awaiting assay
- Broad gold mineralisation reported from aircore drilling at the Circle Valley Gold Project in the Albany-Fraser Mobile Belt, including:
  - **12m @ 1.05g/t Au** within 23m @ 0.64g/t Au from 12m (CVAC061)
  - **4m @ 1.49g/t Au** within 24m @ 0.38g/t Au from 12m (CVAC062)
- Preparation works were completed at Circle Valley during the quarter to allow for drilling activities to recommence in January 2022
- **End of quarter cash position of $6.7M**

Meeka Gold Limited (ASX:MEK) ("**Meeka**" or "**the Company**") is pleased to provide a summary of activities completed during the December 2021 quarter.

The Company completed its Murchison Gold Project Scoping Study ("Study") which was released in December. The Study contemplated underground mining at Andy Well, in addition to both open pit and underground mining at Turnberry. The robust financial outcome and strong project fundamentals outlined by the Study provided the Company with the confidence to approve the advancement of the project through to Pre-feasibility level, which is now underway.

Phase 2 drilling at the Murchison Gold Project progressed steadily though the quarter with both RC and diamond drill rigs on site testing for extensions of the existing 1.1Moz Mineral Resource.

At Circle Valley, in the Albany-Fraser, the Company finalised land access agreements and preparatory works to allow exploration to recommence in early January 2022. This will follow up on the broad gold intersections returned from aircore drilling across a 1.2km by 400m surface gold in soil anomaly.

Financially the Company finished the quarter with a strong cash position of $6.7M, which will provide the flexibility to progress exploration across both Circle Valley and in the Murchison, in addition to funding the Pre-feasibility study work underway for the Murchison Gold Project.

Commenting on the progress made during the quarter, CEO Tim Davidson said:

"The team had a busy quarter as Phase 2 exploration in the Murchison progressed with both diamond and RC drilling. We also released the Murchison Scoping Study, which demonstrated a robust mine plan and potential for significant free cash flow for the Company. The delivery of this Study is the first step toward putting the Murchison Gold Project back into production and we were extremely pleased with the strong Project fundamentals demonstrated by the work. The team have now commenced the Pre-feasibility level study which will be completed later in 2022.

In addition to the activities in the Murchison, the Company finalised plans for the recommencement of drilling at Circle Valley in January 2022. The project is an exciting greenfields exploration opportunity, and we are eager to follow up on the positive results returned from the 2021 work program.

With the multiple work programs underway or planned to commence in January 2022 we look forward to keeping our shareholders abreast of our activities over the coming months."

MINING STUDIES

The Company released its Murchison Gold Project Scoping Study ("Study") during the quarter (see ASX announcement dated 1st December 2021), which assesses the viability of restarting mining operations at the project. The Study contemplates underground mining at Andy Well, in addition to both open pit and underground mining at Turnberry.

The Study delivers a robust financial outcome, paying back start-up capital and delivering a significant internal rate of return over the life-of-mine. The strong project fundamentals outlined by this Study provided the Company with the confidence to advance the project through to pre-feasibility level while continuing to drill test possible extensions of the existing 1.1Moz Mineral Resource base. The pre-feasibility study commenced during the quarter and is expected to be released in mid-2022.

Study outcomes are presented below:

- Pre-tax undiscounted **free cash flow of $182M** (post-tax $131M) at $2,400/oz gold price
- **NPV$_{5\%}$ of $124M**
- **IRR of 46%**
- **EBITDA of $457M**
- Average gold production of ~50,000oz per annum
- Total mine production of **4.9Mt @ 2.8g/t Au for 443,000oz**
- **AISC of $1,655/oz**
- **8 year life of mine**
- Pre-production capital requirement of $52M and payback period of 23 Months
- 72% of gold production is sourced from Measured and Indicated Resources (Inferred 28%)

Table 1 – Project Economics at Various AUD Gold Prices

Project Economics at AUD Gold Price	Unit	$2,300	$2,400	$2,500	$2,600	$2,700
Gold Production	Koz	422	422	422	422	422

EXPLORATION – WESTERN AUSTRALIA

Murchison Gold Project

Exploration drilling in the Murchison targeted Turnberry depth extensions below the planned open pit, and St Anne's where the Company is following up on shallow high-grade mineralisation intersected during the Phase 1 drilling campaign.

Initial indications from drilling at Turnberry South were positive with the intersection of broad strongly altered zones at the target depth with sulphide mineralisation observed in the rock chips. Visible gold was observed in hole 21TBRC007 (see Figure 7).

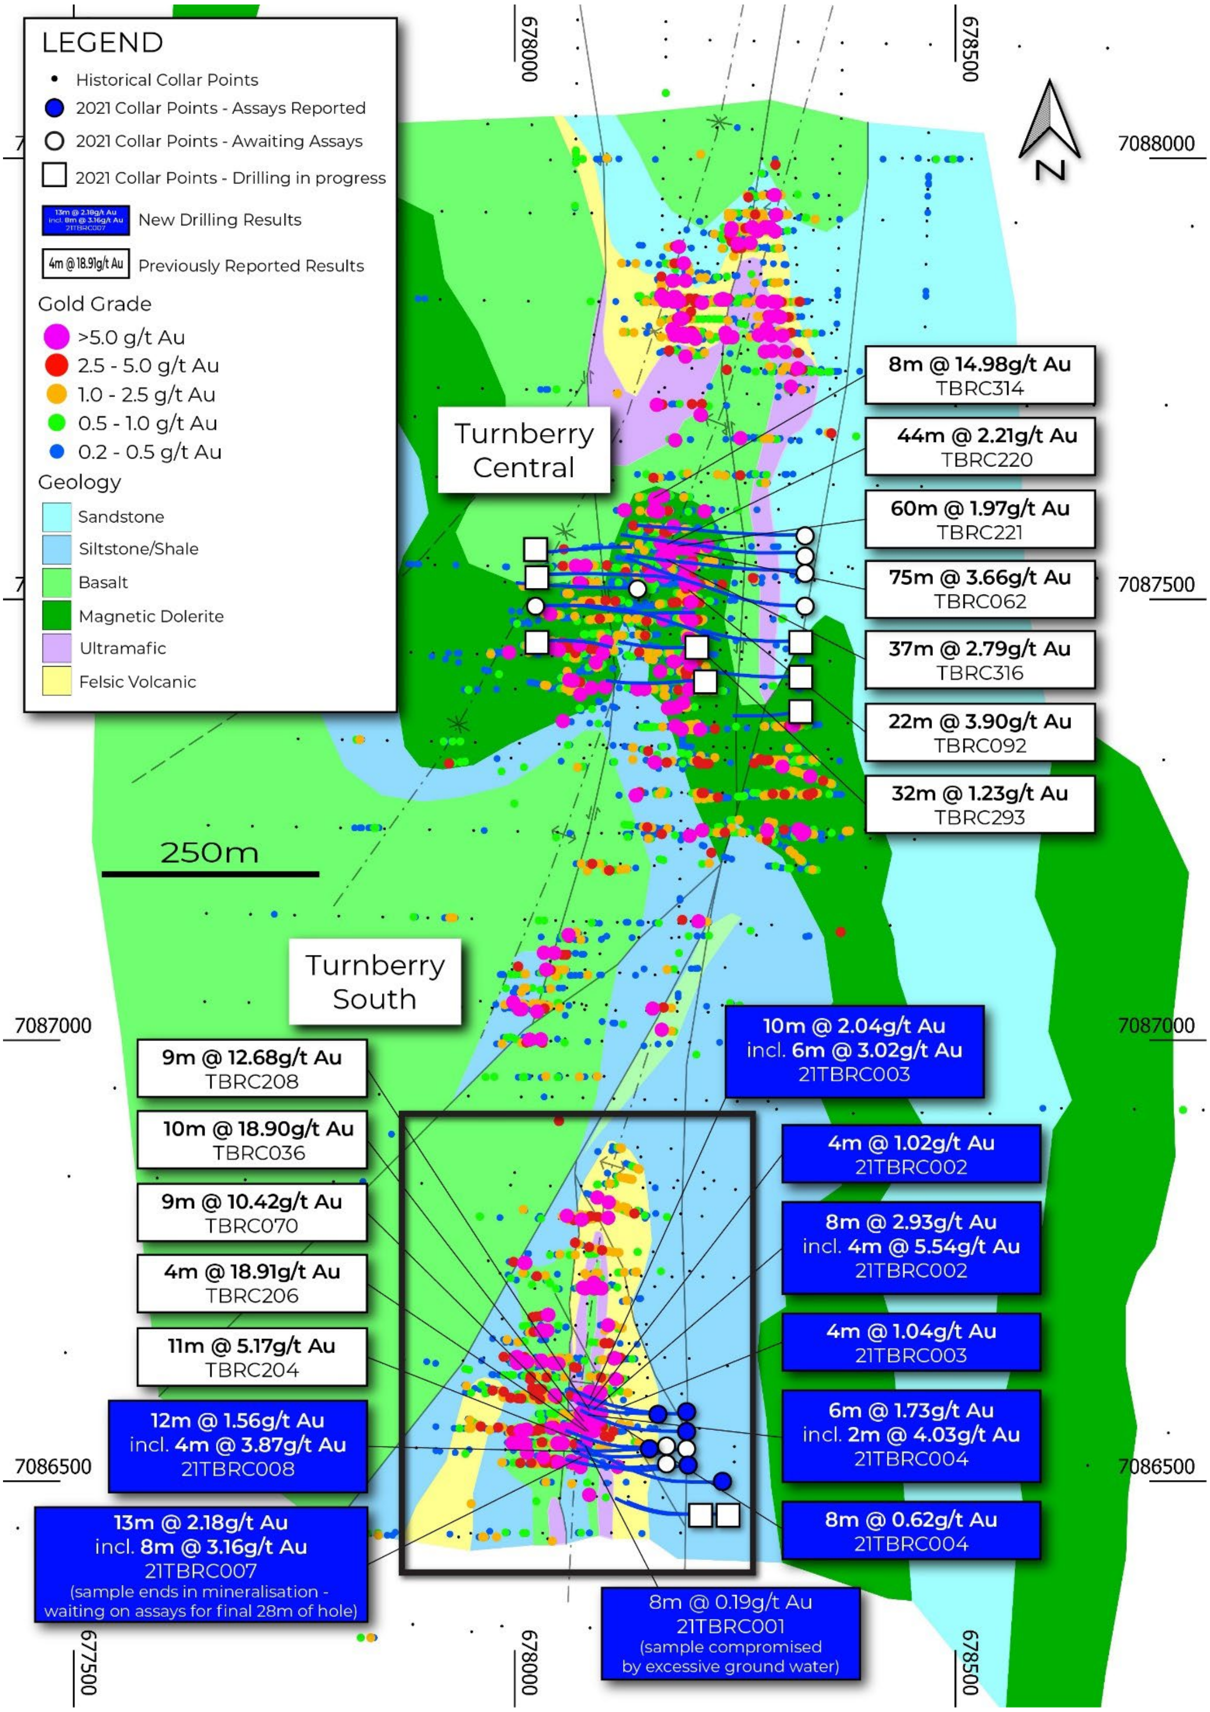
Figure 7: Visible gold in RC chips at 226-227m down hole 21TBRC007.

Due to the industry wide issue with assay turnaround times, the Company had samples for 36 holes (8,200m of drill samples) at the laboratory awaiting assay at the end of the quarter. Subsequent to the end of the quarter the Company received the following results from Turnberry South:

- **13m @ 2.18g/t Au** from 219m including **4m @ 3.87g/t Au** (21TBRC007)
- **8m @ 2.93g/t Au** from 150m including **4m @ 5.54g/t Au** (21TBRC002)
- **10m @ 2.04g/t Au** from 188m including **6m @ 3.02g/t Au** (21TBRC003)
- **12m @ 1.56g/t Au** from 156m including **4m @ 3.87g/t Au** (21TBRC008)
- **6m @ 1.73g/t Au** from 206m including **2m @ 4.03g/t Au** (21TBRC004)
- **4m @ 1.04g/t Au** from 128m (21TBRC003)
- **4m @ 1.02g/t Au** from 174m (21TBRC002)
- **2m @ 2.95g/t Au** from 144m (21TBRC008)

The results came from a high-grade zone of mineralisation on the eastern limb of folded stratigraphy at Turnberry South, which forms part of the 1.5km striking Turnberry deposit.

Figure 8: Plan view of Turnberry Deposit showing drilling intercepts and simplified geological interpretation.



Circle Valley Gold Project

The Company reported the results of the 2021 reconnaissance drilling program undertaken at the Circle Valley Gold Project during the quarter. This drilling was designed to build a depth of cover model over the project area and map the basement geology, providing the Company with a greater understanding of the stratigraphic, metamorphic and structural architecture at Circle Valley.

Two lines of aircore holes were drilled with collars spacings between 20m and 200m. Importantly, numerous holes ended in mineralisation below the transported cover at the top of fresh rock. Results include:

- **12m @ 1.05g/t Au** within 23m @ 0.64g/t Au from 12m (CVAC061)
- **4m @ 1.49g/t Au** within 24m @ 0.38g/t Au from 12m (CVAC062)
- 4m @ 0.83g/t Au from 20m (CVAC004)
- 1m @ 0.31g/t Au from 15m (CVAC027) – hole ends in mineralisation
- 1m @ 0.18g/t Au from 16m (CVAC048) – hole ends in mineralisation
- 1m @ 0.17g/t Au from 12m (CVAC050)
- 1m @ 0.12g/t Au from 15m (CVAC042) – hole ends in mineralisation

CORPORATE

Company Name Change

At the November AGM the Company put forward a Special Resolution proposing a change of Company name. Shareholders voted in favour of this Special Resolution and the Company's name was change to Meeka Gold Limited (new ASX ticker code: MEK) on the 1st of December 2021.

Financial

The Company ended the quarter with $6.7M in cash and no debt.

Refer to the Appendix 5B for an overview of the Company's financial activities during the Quarter.

Capital Structure

The capital structure of the Company at 31st December 2021:

Description	Number
Fully Paid Ordinary Shares	920,385,265
Unlisted options exercisable at $0.040 each, expiring 15 Feb 2025	500,000
Unlisted options exercisable at $0.040 each, expiring 31 Jan 2025	30,000,000
Unlisted options exercisable at $0.050 each, expiring 25 May 2025	300,000
Unlisted options exercisable at $0.075 each, expiring 25 May 2025	300,000
Unlisted options exercisable at $0.100 each, expiring 25 May 2025	600,000
Performance Rights Class B – Andy Well	34,600,000
Performance Rights Class C – Andy Well	21,650,000

TENEMENT SCHEDULE

Tenements held or under application at 31st December 2021.

Project	State	Tenement	Status	Interest at start of quarter	Interest at end of quarter
Murchison Gold Project	WA	E 51/1596	Granted	100%	100%

ABOUT MEEKA GOLD LIMITED

Meeka Gold (ASX:MEK) is a junior gold explorer with a portfolio of exploration projects across Western Australia.

Meeka's flagship Murchison Gold Project has a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and hosts a large high grade 1.1Moz Mineral Resource. The Company is actively exploring on this tenure while also progressing toward production with the release of the Murchison Gold Project Scoping Study in December 2021 outlining a robust Project that produces over 420koz of gold and delivers significant free cashflow.

In addition to the Murchison Gold Project, the Company owns the Circle Valley Gold Project in southern WA. Circle Valley sits in the Albany Fraser Mobile Belt which hosts the Tropicana gold mine (3Moz past production). Gold mineralisation has been identified in two separate locations at Circle Valley and presents an exciting greenfield exploration opportunity, which the Company is aggressively pursuing.

Global Mineral Resource Summary

Project	Measured			Indicated			Inferred			Total		
	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)
Andy Well	150	11.4	55	1,050	9.3	315	650	6.5	135	1,800	8.6	505
Turnberry				6,800	1.6	355	4,500	1.8	255	11,300	1.7	610
TOTAL	**150**	**11.4**	**55**	**7,850**	**2.7**	**670**	**5,150**	**2.4**	**390**	**13,100**	**2.6**	**1,115**

1. Mineral Resources previously reported to the ASX on 18th May 2021 in announcement titled "Murchison Gold Mineral Resource Grows 44% to +1.1 Million Ounces". The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
2. Mineral Resources are produced in accordance with the 2012 Edition of the Australian Code for Reporting of Mineral Resources and Ore Reserves (JORC 2012).
3. Andy Well Mineral Resource is reported using 0.1g/t cut-off grade.
4. Turnberry Open Pit Mineral Resource is reported within a A$2,400/oz pit shell and above 0.5g/t cut-off grade.
5. Turnberry Underground Mineral Resource is reported outside a A$2,400/oz pit shell and above 1.5g/t cut-off grade.

COMPETENT PERSON'S STATEMENT

The information in this release that relates to Exploration Results as those terms are defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve", is based on information reviewed by Mr Duncan Franey, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. Mr Franey is a full-time employee of the Company. Mr Franey has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Franey consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Mineral Resources was first reported by the Company in its announcement to the ASX on 18th May 2021. The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

The information in this Scoping Study release is based on information compiled by Mr Tim Davidson, a Competent Person who is a Member of the Australian Institute of Mining and Metallurgy. Mr Davidson is a full time employee of the company. Mr Davidson is eligible to participate in short and long term incentive plans of and holds shares and performance rights in the Company as previously disclosed. Mr Davidson has sufficient experience in the study, development and operation of gold projects and consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

FORWARD LOOKING STATEMENTS

Certain statements in this report relate to the future, including forward looking statements relating to the Company's financial position, strategy and expected operating results. These forward-looking statements involve known and unknown risks, uncertainties, assumptions and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement and deviations are both normal and to be expected. Other than required by law, neither the Company, their officers nor any other person gives any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements will actually occur. You are cautioned not to place undue reliance on those statements.
