

March 2021 Quarterly Activity Report

Highlights:

- \$3.9m cash at the end of March 2021
- High grade Andy Well and Gnaweeda Gold Project purchased from Silverlake Resources for \$10 per resource ounce (\$8m) in February 2021
 - High confidence, high grade 776,000 ounce gold Mineral Resource secured with 66% in Measured and Indicated classification
 - Strategic land holding in Murchison Gold Field – 343km² Mining Leases and Exploration Licenses
 - Central to 3x large gold processing mills
 - \$30m geological dataset acquired with the project – 786,500m drill hole database, aeromagnetic, sub-audio magnetics and gravity data
- 10,000m Andy Well drill program underway
- Option agreement executed to sell Gecko North Project for total completed value of \$210,000 (\$10,000 option fee paid during March)
- Board and management appointments made to drive the gold exploration and development strategy forward – Paul Adams, Non-Executive Director and Tim Davidson, CEO

Latitude Consolidated Limited (ASX: LCD) ("**Latitude**" or "**the Company**") is pleased to provide a summary of activities completed during the March 2021 Quarter.

EXPLORATION – WESTERN AUSTRALIA

Andy Well and Gnaweeda Gold Project

The Company's primary focus during the quarter was completing the acquisition of the Andy Well and Gnaweeda Gold Projects (the "**projects**") from Silver Lake Resources (ASX: SLR) and on rapidly mobilising resources to commence exploration field work at the projects, located in the Murchison Gold Field of Western Australia.

Upon completion of the acquisition in mid-February (see ASX announcement dated 16 February), the Company submitted a Programme of Work application with the Department of Mines, Industry Regulation and Safety, which was approved in mid-March. Geology field staff were immediately deployed to site to prepare for drilling with the drilling crew arriving in late March. Drilling commenced on the 31st of March 2021 and has been progressing steadily. Initial assay results are expected in early June.

Commenting on progress made during the quarter, CEO Tim Davidson said: “A tremendous quarter for Latitude, highlighted by the completion of the Andy Well and Gnaweeda acquisition and the commencement of our initial drilling program. We have put in place a clear strategy aimed at demonstrating the underlying value of these assets and we have wasted no time getting our first drilling program underway. Latitude remains well-funded to deliver our planned work programs for this year and I look forward to providing progress on exploration at regular intervals.”

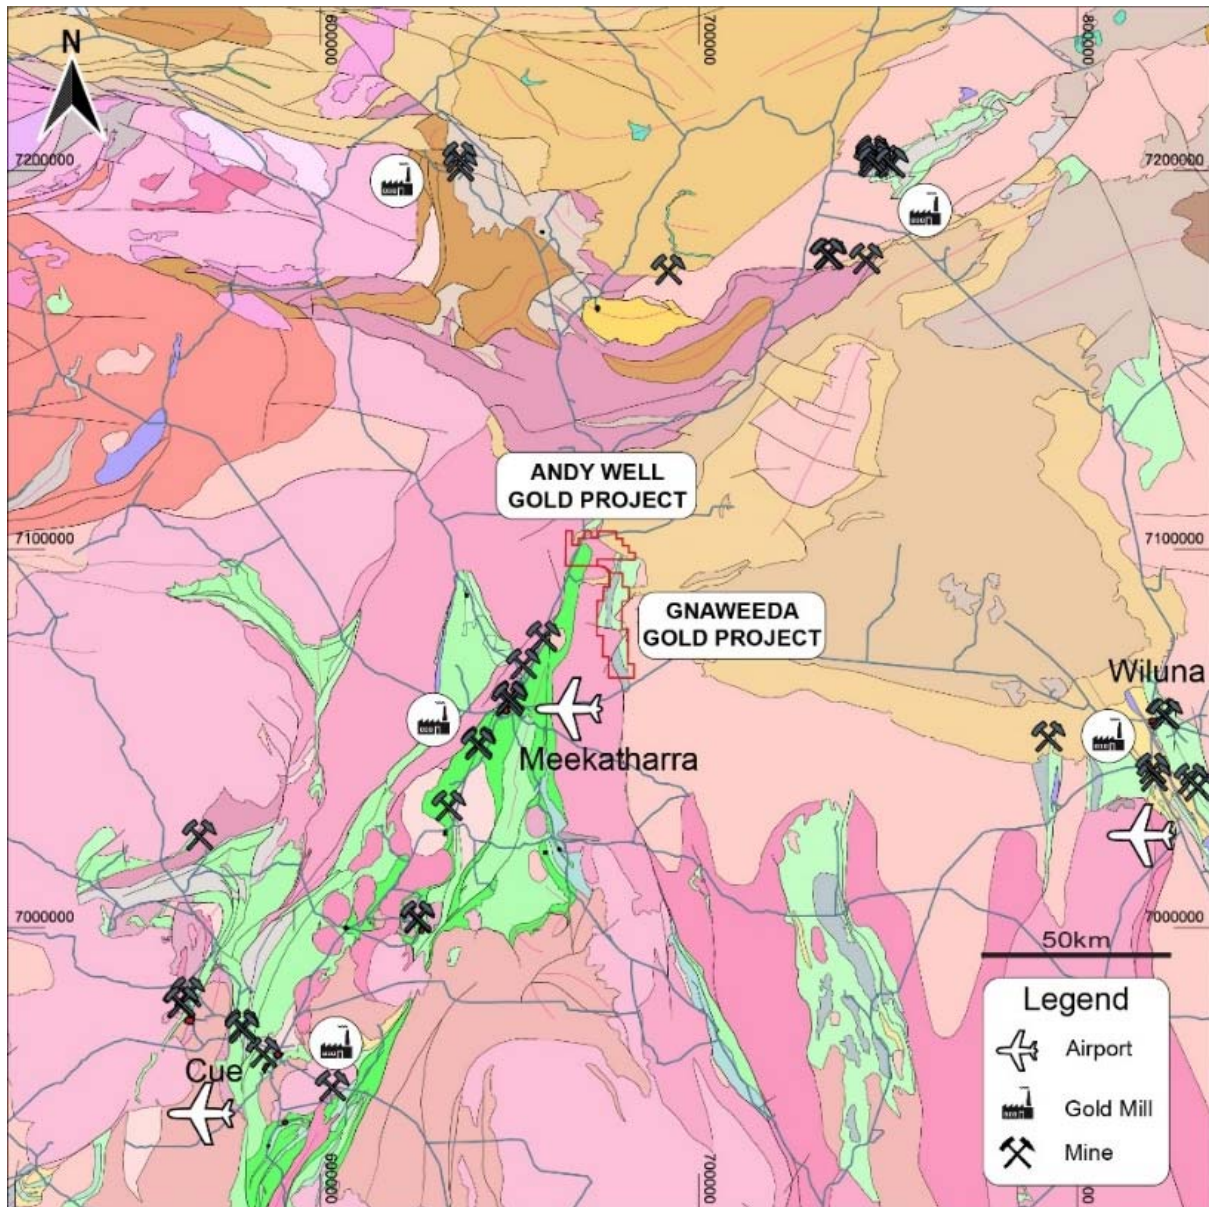

Figure 2: Andy Well and Gnaweeda Gold Project location.

Circle Valley Gold Project

The Company was successful in Round 22 of the Western Australian Government's Exploration Incentive Scheme co-funded drilling program and was awarded a \$150,000 funding grant to test bedrock gold occurrences with diamond and RC drilling. Exploration targeting work and land access agreements were progressed with a view to commence field work at the project in the second half of this year.

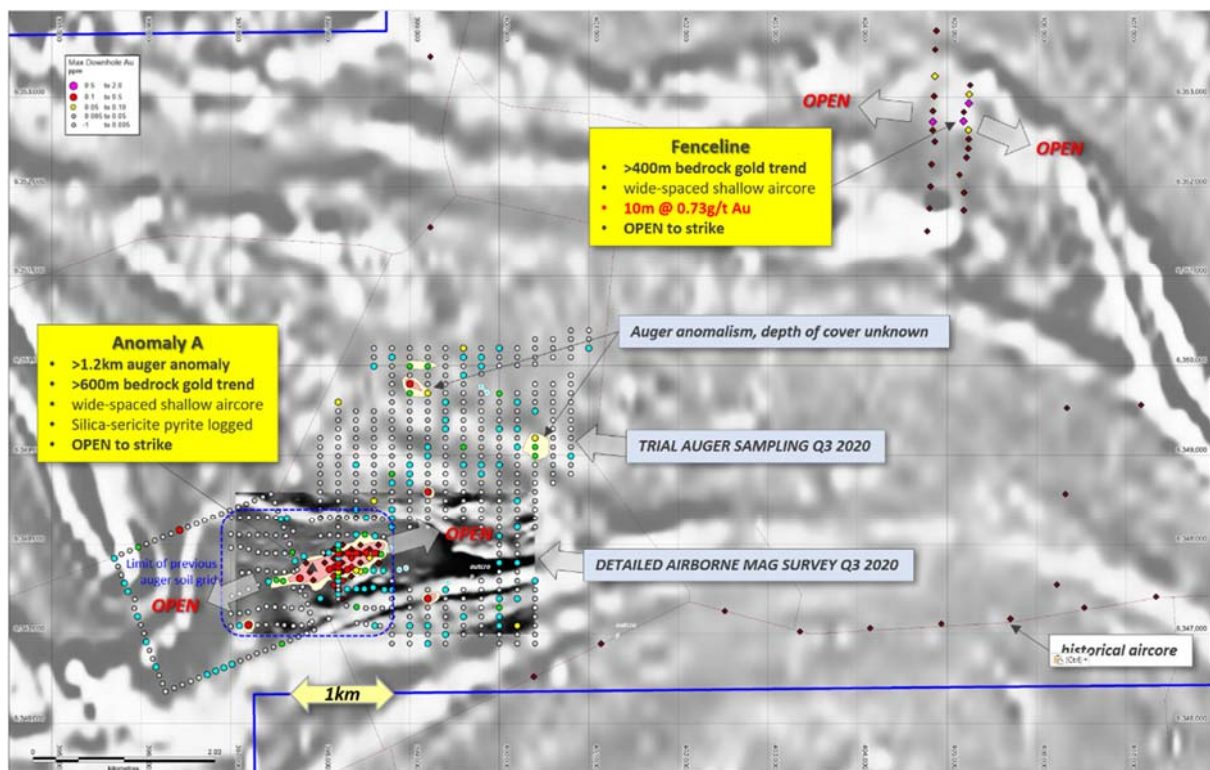

Figure 4: Circle Valley auger geochemistry sampling and aircore drill results.

Gecko North Gold Project

The Company entered into an option agreement for the sale of its Gecko North Gold Project (E15/1587) with Origin Gold Mines Limited (Origin), a pre-IPO company that is seeking to list on the ASX in 2021. The total completed value of the Gecko North transaction is \$210,000 in cash and Origin shares, plus 1.5% net smelter return royalty over all minerals extracted from the property. The Company has a clear strategy to rationalise its project portfolio, freeing up capital to advance exploration activities on its flagship gold properties. The Gecko North transaction aligns with the Company's strategy while maintaining exposure to project upside through a shareholding in Origin and a net smelter return royalty over the property.

EXPLORATION – SOUTH AUSTRALIA

Skye Gold Project

The Company continued to progress through the approvals process during the quarter at the Skye Gold Project in South Australia with registration of the Native Title Agreement and completion of a heritage survey over the proposed drill locations during the quarter. No sites of cultural significance were found within the prospect areas.

The new regulatory approvals process for exploration activities in South Australia (implemented at the beginning of 2021) has however caused delays, with the Company continuing to negotiate with the South Australian Department for Energy and Mining to expedite approval of the Program for Environment Protection and Rehabilitation, which would allow drilling activities to commence. The Company will continue to keep the market informed regarding activities at Skye as they progress.

Figure 5: Aerial view of heritage survey being conducted at Skye.

CORPORATE

Financial

The Company had \$3.9m in cash at the end of the Quarter. Refer to the Appendix 5B for an overview of the Company's financial activities during the Quarter.

Capital Structure

The capital structure of the Company at 31st March 2021:

Description	Number
Fully Paid Ordinary Shares	781,061,355
Unlisted options exercisable at \$0.05 each, expiring 31 May 2021	12,500,000
Unlisted options exercisable at \$0.25 each, expiring 24 Nov 2021	750,000
Unlisted options exercisable at \$0.04 each, expiring 15 Feb 2025	500,000
Unlisted options exercisable at \$0.04 each, expiring 31 Jan 2025	30,000,000
Performance Shares – Skye Gold (drill intersection of greater than 1m length with minimum gold grade of 20 gram x metre)	8,823,529
Performance Shares – Andy Well (share price above \$0.05 at a 15 day VWAP & 1,000,000 ounce gold JORC Resource)	21,650,000
Performance Shares – Andy Well (share price above \$0.075 at a 15 day VWAP & delivery of NPV(8%) \$50M scoping study)	34,600,000
Performance Shares – Andy Well (share price above \$0.10 at a 15 day VWAP & delivery of Bankable Feasibility Study)	21,650,000

Board and Management Changes

Upon completion of the Andy Well transaction in mid-February, Tim Davidson was appointed as Chief Executive Officer and Paul Adams as a Non-Executive Director.

Paul is a qualified geologist and finance professional with over 30 years' experience across capital markets, exploration and mining. Paul was Managing Director of Spectrum Metals Limited prior to it being taken over by Ramelius Resources and previously served as Director – Head of Research and Natural Resources at DJ Carmichael Pty Ltd for 12 years. Paul's operational experience includes senior roles with leading mining companies Placer Dome, Australian Gold Mines Ltd and Dominion Mining, both within Australia and overseas. Paul holds a Graduate Diploma in Applied Finance and Investment from the Financial Services Institute of Australia. He is currently a Non-Executive Director of Kalamazoo Resources Limited.

Tim is a qualified mining engineer with extensive operational, technical, and management experience gained while working with prominent mining companies including Newmont and BHP. Prior to joining Latitude, he held senior roles within Silver Lake Resources, the vendor of Latitude's recently acquired flagship projects.

Nick Castleden resigned from his position as Non-Executive Director of the Company, effective March 31st, 2021. Nick was appointed to the Board in June of 2017 and played a key role towards building Latitude's current portfolio of gold exploration properties.

With experienced geologist Paul Adams joining the Board in February 2021 as part of the Andy Well transaction, and with Nick's growing commitments as Managing Director of Apollo

Consolidated Limited, Nick felt it was the appropriate time to step down from the Latitude Board. The Board is very much indebted to Nick for his directorship over the period from 2017.

Corporate Development

The Company's new CEO Tim Davidson conducted several interviews during the quarter with media and mining industry publications in relation to the high-grade Andy Well and Gnaweeda Gold Project transaction.

Latitude also launched its new website, which can be accessed at the address below.

Upcoming Activities

The company continues to progress exploration and mining study work across its portfolio of gold projects, with the following activities planned for the remainder of 2021:

Planned Activity	Apr 2021	May 2021	Jun 2021	Jul 2021	Aug 2021	Sep 2021	Oct 2021	Nov 2021	Dec 2021
Andy Well / Gnaweeda Gold Project - Western Australia									
Andy Well drilling									
Gnaweeda drilling									
Andy Well assay results									
Gnaweeda assay results									
Phase 2 drill targeting									
Phase 2 drilling									
Mine Scoping Study									
Skye Gold Project - South Australia									
Environmental / Regulatory approval									
Drilling - pending approvals process									
Circle Valley Gold Project - Western Australia									
PoW applications									
EIS co-funded drilling									
Assay Results									

This announcement has been authorised for release by the Latitude Board of Directors.

ABOUT LATITUDE CONSOLIDATED

Latitude Consolidated (ASX:LCD) is a junior gold explorer with a portfolio of exploration projects across Western Australia and South Australia.

Latitude's flagship projects are the Andy Well and Gnaweeda Gold Projects that have a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and hosts a large high grade Mineral Resource. The company is actively exploring on this tenure while also progressing mining studies to determine the best pathway to production.

The Skye Gold Project in the Gawler Craton in South Australia is located in a region known for plunge-continuous high-grade gold mineralisation such as that seen at nearby Challenger Gold Deposit (1.2Moz past production). The exploration prize in the Gawler Province terrain can be significant, with high-value, high-grade discoveries in the district having a reputation for excellent down-plunge continuity of mineralised shoots.

The Circle Valley project in southern WA sits in the Albany Fraser mobile belt. This belt is also home to the Tropicana gold mine (3Moz past production). Primary gold mineralisation has been identified in two separate locations at Circle Valley and presents an exciting exploration opportunity for Latitude.

RESOURCE STATEMENT

Project	Measured			Indicated			Inferred			Total		
	Tonnes (kt)	Au Grade (g/t)	Au Ounces (oz)	Tonnes (kt)	Au Grade (g/t)	Au Ounces (oz)	Tonnes (kt)	Au Grade (g/t)	Au Ounces (oz)	Tonnes (kt)	Au Grade (g/t)	Au Ounces (oz)
Andy Well	127	13.7	56,000	1,063	9.2	315,000	628	6.6	134,000	1,818	8.6	505,000
Turnberry				2,043	2.2	146,000	2,196	1.8	124,000	4,239	2.0	271,000
TOTAL	127	13.7	56,000	3,106	4.6	461,000	2,824	2.8	258,000	6,057	4.0	776,000

- Mineral Resources are produced in accordance with the 2012 Edition of the Australian Code for Reporting of Mineral Resources and Ore Reserves (JORC 2012).
- Andy Well Mineral Resource is reported using 0.1g/t cut-off grade.
- Turnberry Mineral Resource is reported using 1.0g/t cut-off grade.

TENEMENT SCHEDULE

Project	State	Tenement	Status	LCD interest at start of quarter	LCD interest at end of quarter
Andy Well	WA	E 51/1596	Granted	100%	100%

COMPETENT PERSON'S STATEMENT

The information in this release that relates to Exploration Results for the Circle Valley Project as those terms are defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve", is based on information compiled by Mr. Nick Castleden, who is a consultant to the Company and a Member of the Australian Institute of Geoscientists. Mr. Castleden has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which they are undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve". Mr. Castleden consents to the inclusion of the matters based on his information in the form and context in which it appears.

The information in this report that relates to Mineral Resources for the Andy Well and Turnberry deposits is based upon information reviewed by Mr Andrew Hawker, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Mr Hawker is an independent consultant to Latitude Consolidated. Mr Hawker has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Hawker consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Mineral Resources was first reported by the Company in its announcement to the ASX on 21st December 2020. The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
