

June 2021 Quarterly Activity Report

Highlights:

- Strong cash position of \$9.2m at the end of June 2021
- Planning for Phase 2 exploration drilling being finalised with fieldwork starting in September 2021
- High grade drill results reported during the quarter at the Company's 1.1Moz Murchison Gold Project include:

Suzie North Prospect

- 7.0m @ 1.90g/t Au from 121m including 1.0m @ 9.59g/t Au

Margaret Prospect

- 3.0m @ 2.52g/t Au from 136m including 1.0m @ 7.00g/t Au
- 9.0m @ 1.14g/t Au from 150m including 2.0m @ 3.09g/t Au

- Mining study progressing as planned and will be reported to the market in the second half of 2021

Latitude Consolidated Limited (ASX: LCD) ("**Latitude**" or "**the Company**") is pleased to provide a summary of activities completed during the June 2021 Quarter.

Figure 1: Latitude's Western Australian gold project portfolio.

EXPLORATION – WESTERN AUSTRALIA

Murchison Gold Project

The Company completed a maiden exploration campaign at its flagship Murchison Gold Project which it acquired from Silver Lake Resources (ASX:SLR) in February of this year.

Figure 2: Murchison Gold Project tenure.

Drilling commenced on the 31st of March 2021 and progressed steadily through the quarter. This Phase 1 first pass drilling systematically tested several highly prospective exploration targets outside of the known Mineral Resources. The company received several excellent results during the quarter, including confirmation of a new mineralised trend at Suzie North (see ASX release dated 15th June 2021) and identification of a high-grade footwall structure at Margaret (see ASX release dated 23rd June 2021).

Phase 1 Suzie North drill intercepts include:

- **7m @ 1.90g/t Au** from 121m including **1m @ 9.59g/t Au** in 21AWRC0003

Phase 1 Margaret drill intercepts include:

- **3.0m @ 2.52g/t Au** from 136m including **1.0m @ 7.00g/t Au** in 21AWRC0008
- **9.0m @ 1.14g/t Au** from 150m including **2.0m @ 3.09g/t Au** in 21AWRC0009

Figure 3: Plan showing old Suzie North interpretation, historical drilling and new strike interpretation.

Figure 4: Section through Judy South, Jenny, Suzie and Margaret (note: Judy South, Jenny and Suzie strike at an oblique angle to Margaret interpretation which is shown in cross section).

Importantly, following the end of the quarter further excellent results were received which confirm a large mineralised system at the Fairway trend extending 5.5km from Turnberry (610koz Mineral Resource) to St Anne's (see *ASX release dated 15th June 2021*). Assay results will continue to be reported as they are received over the coming weeks.

Planning for Phase 2 exploration drilling is being finalised with drilling contractors mobilising in September.

Circle Valley Gold Project

The Company was successful in Round 22 of the Western Australian Government's Exploration Incentive Scheme co-funded drilling program and was awarded a \$150,000 funding grant to test bedrock gold occurrences. The Company commenced field work ahead of schedule with a first pass aircore program consisting of 2,165m commencing in June to map the underlying geology and identify remnant portions of greenstone which have the potential to host primary gold mineralisation. Further aircore drilling, followed by RC and diamond drilling is planned commence over the coming two quarters.

The project area is located within the Albany Fraser mobile belt which is home to the multimillion-ounce Tropicana gold deposit positioned in a highly metamorphosed craton margin setting similar to Circle Valley. Tropicana was discovered in 2005 after AngloGold Ashanti (ASX:AGG) following up an unexplained gold-in-soil anomaly IGO (ASX:IGO) had recognised in public domain regional data collected in the 1990's.

During 2020 the Company completed a large auger geochemical sampling program at Circle Valley covering Anomaly A and identified anomalous gold in soil over a 1.2km strike. Limited historical aircore drilling also identified anomalous gold mineralisation at Anomaly A and separately the Fenceline prospect.

Figure 5: Circle Valley Gold Project aeromagnetic and drill results.

Figure 6: Circle Valley auger geochemistry sampling and aircore drill results.

Gecko North Gold Project

The Company extended an option agreement for the sale of its Gecko North Gold Project (E15/1587) with Origin Gold Mines Limited (Origin), a pre-IPO company that is seeking to list on the ASX in 2021. In consideration for the option extension Origin paid the Company \$10,000. The total completed value of the Gecko North transaction is \$220,000 in cash and Origin shares, plus 1.5% net smelter return royalty over all minerals extracted from the property. The Company has a clear strategy to rationalise its project portfolio, freeing up capital to advance exploration activities on its flagship Western Australian gold properties. The Gecko North transaction aligns with the Company's strategy while maintaining exposure to project upside through a shareholding in Origin and a net smelter return royalty over the property.

EXPLORATION – SOUTH AUSTRALIA

Skye Gold Project

Minimal activity was undertaken at the Skye Gold Project during the quarter.

Following the end of the quarter the Company returned this tenure to the project vendor in accordance with the terms set out in the Skye Tenement Acquisition Agreement. This decision is consistent with the Company's strategy to rationalise its project portfolio and focus exploration activities on its flagship Western Australian gold properties.

CORPORATE

Financial

The Company ended the quarter with \$9.2m in cash.

During the quarter the Company raised \$6.75 million to fund the next phase of exploration activity at its flagship Western Australian gold properties.

Refer to the Appendix 5B for an overview of the Company's financial activities during the Quarter.

Capital Structure

The capital structure of the Company at 31st March 2021:

Description	Number
Fully Paid Ordinary Shares	898,735,265
Unlisted options exercisable at \$0.250 each, expiring 24 Nov 2021	750,000
Unlisted options exercisable at \$0.040 each, expiring 15 Feb 2025	500,000
Unlisted options exercisable at \$0.040 each, expiring 31 Jan 2025	30,000,000
Unlisted options exercisable at \$0.050 each, expiring 25 May 2025	300,000
Unlisted options exercisable at \$0.075 each, expiring 25 May 2025	300,000
Unlisted options exercisable at \$0.100 each, expiring 25 May 2025	600,000
Performance Shares Class A – Skye Gold (drill intersection of greater than 1m length with minimum gold grade of 20 gram x metre)	8,823,529
Performance Rights Class A – Andy Well (share price above \$0.05 at a 15 day VWAP & 1,000,000 ounce gold JORC Resource)	21,650,000
Performance Rights Class B – Andy Well (share price above \$0.075 at a 15 day VWAP & delivery of NPV(8%) \$50M scoping study)	34,600,000
Performance Rights Class C – Andy Well (share price above \$0.10 at a 15 day VWAP & delivery of Bankable Feasibility Study)	21,650,000

During the quarter the performance hurdles for Performance Rights Class A relating to the Andy Well transaction were met. The Company anticipated these shares will be issued in the coming quarter.

Teck Australia Pty Ltd Royalty

During the quarter the Company extinguished the clawback option held by Teck Australia Pty Ltd over the Gnaweeda tenements, which form part of the Murchison Gold Project. In consideration for extinguishing the option, the Company issued Teck \$300,000 in Latitude shares (priced at 10 day VWAP prior to completion = \$0.05059).

Corporate Development

The Company's CEO Tim Davidson conducted several interviews during the quarter with media and mining industry publications in relation to the Western Australian gold properties. Links to two interviews below:

ABOUT LATITUDE CONSOLIDATED

Latitude Consolidated (ASX:LCD) is a junior gold explorer with a portfolio of exploration projects across Western Australia and South Australia.

Latitude's flagship Murchison Gold Project has a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and hosts a large high grade 1.1Moz Mineral Resource. The company is actively exploring on this tenure while also progressing mining studies to determine the best pathway to production.

The Circle Valley project in southern WA sits in the Albany Fraser mobile belt. This belt is also home to the Tropicana gold mine (3Moz past production). Primary gold mineralisation has been identified in two separate locations at Circle Valley and presents an exciting exploration opportunity for Latitude.

The Skye Gold Project in the Gawler Craton in South Australia is located in a region known for plunge-continuous high-grade gold mineralisation such as that seen at nearby Challenger Gold Deposit (1.2Moz past production). The exploration prize in the Gawler Province terrain can be significant, with high-value, high-grade discoveries in the district having a reputation for excellent down-plunge continuity of mineralised shoots.

UPCOMING ACTIVITIES

The company continues to progress exploration and mining study work across its portfolio of gold projects, with the following activities planned for the remainder of 2021:

Planned Activity	Jul	Aug	Sep	Oct	Nov	Dec
	2021	2021	2021	2021	2021	2021
Murchison Gold Project - Western Australia						
Phase 1 Drilling						
Phase 1 Assay Results						
Phase 2 Drilling						
Mining Study						
Circle Valley Gold Project - Western Australia						
PoW applications						
ES co-funded drilling						
Assay Results						
Skye Gold Project - South Australia						
Environmental / Regulatory approval						
Drilling - pending approvals process						

COMPETENT PERSON'S STATEMENT

The information in this release that relates to Exploration Results as those terms are defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve", is based on information reviewed by Mr Duncan Franey, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Mr Franey is a full-time employee of the Company. Mr Franey has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Franey consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Mineral Resources was first reported by the Company in its announcement to the ASX on 18th May 2021. The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

FORWARD LOOKING STATEMENTS

Certain statements in this report relate to the future, including forward looking statements relating to the Company's financial position, strategy and expected operating results. These forward-looking statements involve known and unknown risks, uncertainties, assumptions and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement and deviations are both normal and to be expected. Other than required by law, neither the Company, their officers nor any other person gives any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements will actually occur. You are cautioned not to place undue reliance on those statements.

RESOURCE STATEMENT

Project	Measured			Indicated			Inferred			Total		
	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)
Andy Well	150	11.4	55	1,050	9.3	315	650	6.5	135	1,800	8.6	505
Turnberry				6,800	1.6	355	4,500	1.8	255	11,300	1.7	610
TOTAL	150	11.4	55	7,850	2.7	670	5,150	2.4	390	13,100	2.6	1,115

Notes:

1. Mineral Resources previously reported to the ASX on 18th May 2021 in announcement titled "Murchison Gold Mineral Resource Grows 44% to +1.1 Million Ounces". The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
2. Mineral Resources are produced in accordance with the 2012 Edition of the Australian Code for Reporting of Mineral Resources and Ore Reserves (JORC 2012).
3. Andy Well Mineral Resource is reported using 0.1g/t cut-off grade.
4. Turnberry Open Pit Mineral Resource is reported within a A\$2,400/oz pit shell and above 0.5g/t cut-off grade.
5. Turnberry Underground Mineral Resource is reported outside a A\$2,400/oz pit shell and above 1.5g/t cut-off grade.
6. Numbers in the Mineral Resource table have been rounded.

TENEMENT SCHEDULE

Project	State	Tenement	Status	LCD interest at start of quarter	LCD interest at end of quarter
Murchison Gold Project	WA	E 51/1596	Granted	100%	100%
		E 51/1217	Granted	100%	100%
		M 51/870	Granted	100%	100%
		E 51/1625	Granted	100%	100%
		E 51/1626	Granted	100%	100%
		E 51/926	Granted	100%	100%
		E 51/927	Granted	100%	100%
		M 51/882	Granted	100%	100%
Circle Valley	WA	E 63/2007	Granted	100%	100%
Gecko North	WA	E 15/1587	Granted	100%	100%
Skye*	SA	EL6492	Granted	100%	100%

*Note: Following the end of the quarter the Company returned the Skye tenure to the project vendor in accordance with the terms set out in the Skye Tenement Acquisition Agreement.
