

September 2021 Quarterly Activity Report

Highlights:

- Strong cash position of \$7.8M at the end of September 2021
- Final stamp duty payment of \$406k associated with the purchase of the Murchison Gold Project made to the Office of State Revenue
- Final assays received from St Anne's confirming the presence of very high-grade mineralisation and provides an excellent target for Phase 2 drilling:

St Anne's:

- 3.0m @ 13.82g/t Au (incl. 1.0m @ 31.20g/t Au) from 103m (21GNRC0010)
- Phase 2 exploration drilling at the Murchison Gold Project commenced late in the quarter – drilling to initially target Turnberry Deeps followed by St Anne's
- Mining study progressing as planned and will be reported in December

Latitude Consolidated Limited (ASX: LCD) ("**Latitude**" or "**the Company**") is pleased to provide a summary of activities completed during the September 2021 Quarter.

Figure 1: Phase 2 drilling underway at Turnberry South.

Figure 2: Latitude's Western Australian gold project portfolio.

EXPLORATION – WESTERN AUSTRALIA

Murchison Gold Project

During the quarter personnel and equipment were mobilised to site to commence Phase 2 drilling (see ASX release dated 4th October 2021). The program will initially be targeting the thick high-grade Turnberry Mineralisation, following up on previously reported intersections including:

- **9m @ 10.4g/t Au** from 162m in TBRC070
- **41m @ 4.8g/t Au** from 148m in TBRC062
- **18m @ 4.7g/t Au** from 192m in TBRC092
- **18m @ 3.4g/t Au** from 154m in TBRC221
- **37m @ 2.8g/t Au** from 209m in TBRC316
- **23m @ 7.1g/t Au** from 69m in TBRC208

Aircore drilling at St Anne's is scheduled to commence in the December quarter with the Company eager to follow up a number of broad high-grade drill results where anomalous gold is observed over 500m of strike.

Figure 3: Plan showing the Turnberry Project, initial Phase 2 drilling targets and Au drilling intercepts overlaid on aeromagnetics.

Figure 4: Section showing the Turnberry South high-grade shoot and Phase 2 drilling pierce points.

Figure 5: Plan showing the Fairway mineralised trend that extends from the Turnberry Mineral Resource to the St Anne's Prospect, Au drilling intercepts overlaid on aeromagnetic image.

Late in the quarter the Company received the final assay results for Phase 1 drilling at the Murchison Gold Project, including from St Anne's and Judy North (see ASX release dated 6th October 2021).

St Anne's

The St Anne's mineralisation consists of quartz veining and pyrite alteration (as seen at Turnberry) and occurs on a geological contact between mafic dolerite and sedimentary shales. Both rock types host mineralisation at Turnberry with the dolerite generally hosting better continuity of mineralisation and higher grades. The St Anne's prospect is a high priority target given the geological similarities it displays with Turnberry. Follow up drilling is planned to commence late in the December quarter.

Phase 1 drill intercept:

- **3.0m @ 13.82g/t Au (incl. 1.0m @ 31.20g/t Au)** from 103m (21GNRC0010)

Figure 6: Plan showing St Anne's prospect, Au drilling intercepts overlaid on aeromagnetic image.

Judy North

The drilling at Judy North tested for the continuation of high-grade mineralisation in an area with limited historical drilling. One of the five holes drilled by the Company intersected a high-grade shoot 70m below and to the north of drilling completed by Doray Minerals Limited during 2015. This indicates a strong northerly plunge component to the mineralisation. The remaining four holes intersected the Judy North lode outside this high-grade shoot. The consistent width of mineralisation in all five holes from Phase 1 does however demonstrate the continuity of the mineralised structure and provides a strong target for Phase 2 drilling.

Judy North remains open to the north and the Company intends to further test this high-grade mineralisation during the Phase 2 drilling program.

Phase 1 Judy North high grade drill intercept:

- **5.0m @ 2.96g/t Au** from 154m including **2.0m @ 5.95g/t Au** in 21AWRC0005

Phase 1 Judy North drill intercepts outside of the high-grade shoot:

- 5.0m @ 0.42g/t Au from 165m in 21AWRC0004
- 5.0m @ 0.26g/t Au from 155m in 21AWRC0006
- 6.0m @ 0.25g/t Au from 209m in 21AWRC0007
- 4.0m @ 0.14g/t Au from 192m in 21AWRC0018

Figure 7: Section showing Judy North Au drilling intercepts and high-grade northerly plunging shoots.

Circle Valley Gold Project

The Company completed a first pass aircore program consisting of 2,165m partially funded through the Western Australian Government's Exploration Incentive Scheme. The program aims to map the underlying geology and identify remnant portions of greenstone which have the potential to host primary gold mineralisation. All assays from the 2,165m aircore program remain outstanding and will be reported as they are returned from the laboratory.

The project area is located within the Albany Fraser mobile belt which is home to the multimillion-ounce Tropicana gold deposit positioned in a highly metamorphosed craton margin setting similar to Circle Valley. Tropicana was discovered in 2005 after AngloGold Ashanti (ASX:AGG) followed up an unexplained gold-in-soil anomaly that IGO (ASX:IGO) had recognised in public domain regional data collected in the 1990's.

During 2020 the Company completed a large auger geochemical sampling program covering Anomaly A and identified anomalous gold in soil over a 1.2km strike. Limited historical aircore drilling also identified anomalous gold mineralisation at Anomaly A and separately the Fenceline prospect. Further follow up drilling is planned over the coming two quarters.

Figure 9: Circle Valley auger geochemistry sampling and aircore drill results.

CORPORATE

Financial

The Company ended the quarter with \$7.8M in cash.

Refer to the Appendix 5B for an overview of the Company's financial activities during the Quarter.

Capital Structure

The capital structure of the Company at 30th September 2021:

Description	Number
Fully Paid Ordinary Shares	898,735,265
Unlisted options exercisable at \$0.250 each, expiring 24 Nov 2021	750,000
Unlisted options exercisable at \$0.040 each, expiring 15 Feb 2025	500,000
Unlisted options exercisable at \$0.040 each, expiring 31 Jan 2025	30,000,000
Unlisted options exercisable at \$0.050 each, expiring 25 May 2025	300,000
Unlisted options exercisable at \$0.075 each, expiring 25 May 2025	300,000
Unlisted options exercisable at \$0.100 each, expiring 25 May 2025	600,000
Performance Rights Class A – Andy Well (share price above \$0.05 at a 15 day VWAP & 1,000,000 ounce gold JORC Resource)	21,650,000
Performance Rights Class B – Andy Well (share price above \$0.075 at a 15 day VWAP & delivery of NPV(8%) \$50M scoping study)	34,600,000
Performance Rights Class C – Andy Well (share price above \$0.10 at a 15 day VWAP & delivery of Bankable Feasibility Study)	21,650,000

Proposed Change of Company Name

The Company will put forward a Special Resolution at the November AGM proposing a change of Company name. The Company will seek shareholder approval to change the name of the Company to:

MEEKA GOLD LIMITED

ASX Code: MEK

This announcement has been authorised for release by the Latitude Board of Directors.

ABOUT LATITUDE CONSOLIDATED

Latitude Consolidated (ASX:LCD) is a junior gold explorer with a portfolio of exploration projects across Western Australia.

Latitude's flagship Murchison Gold Project has a combined 343km² landholding in the prolific Murchison Gold Fields of Western Australia and hosts a large high grade 1.1Moz Mineral Resource. The company is actively exploring on this tenure while also progressing mining studies to determine the best pathway to production.

The Circle Valley project in southern WA sits in the Albany Fraser mobile belt. This belt is also home to the Tropicana gold mine (3Moz past production). Primary gold mineralisation has been identified in two separate locations at Circle Valley and presents an exciting exploration opportunity for Latitude.

Global Mineral Resource Summary

Project	Measured			Indicated			Inferred			Total		
	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)	Tonnes ('000t)	Grade (g/t)	Ounces ('000oz)
Andy Well	150	11.4	55	1,050	9.3	315	650	6.5	135	1,800	8.6	505
Turnberry				6,800	1.6	355	4,500	1.8	255	11,300	1.7	610
TOTAL	150	11.4	55	7,850	2.7	670	5,150	2.4	390	13,100	2.6	1,115

Notes:

1. Mineral Resources previously reported to the ASX on 18th May 2021 in announcement titled "Murchison Gold Mineral Resource Grows 44% to +1.1 Million Ounces". The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.
2. Mineral Resources are produced in accordance with the 2012 Edition of the Australian Code for Reporting of Mineral Resources and Ore Reserves (JORC 2012).
3. Andy Well Mineral Resource is reported using 0.1g/t cut-off grade.
4. Turnberry Open Pit Mineral Resource is reported within a A\$2,400/oz pit shell and above 0.5g/t cut-off grade.
5. Turnberry Underground Mineral Resource is reported outside a A\$2,400/oz pit shell and above 1.5g/t cut-off grade.
6. Numbers in the Mineral Resource table have been rounded.

UPCOMING ACTIVITIES

The company continues to progress exploration and mining study work across its portfolio of gold projects, with the following activities planned for the remainder of 2021 and early 2022:

Planned Activity	Oct	Nov	Dec	Jan	Feb	Mar
	2021	2021	2021	2022	2022	2022
Murchison Gold Project - Western Australia						
Phase 2 Drilling						
Phase 2 Assay Results						
Mine Scoping Study						
Pre-feasibility Study						
Circle Valley Gold Project - Western Australia						
EIS co-funded drilling						
Assay Results						

COMPETENT PERSON'S STATEMENT

The information in this release that relates to Exploration Results as those terms are defined in the 2012 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserve", is based on information reviewed by Mr Duncan Franey, a Competent Person who is a member of The Australasian Institute of Mining and Metallurgy. Mr Franey is a full-time employee of the Company. Mr Franey has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Franey consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.

The information in this release that relates to Mineral Resources was first reported by the Company in its announcement to the ASX on 18th May 2021. The Company is not aware of any new information or data that materially affects the information included in this announcement and that all material assumptions and technical parameters underpinning the estimates continue to apply and have not materially changed.

FORWARD LOOKING STATEMENTS

Certain statements in this report relate to the future, including forward looking statements relating to the Company's financial position, strategy and expected operating results. These forward-looking statements involve known and unknown risks, uncertainties, assumptions and other important factors that could cause the actual results, performance or achievements of the Company to be materially different from future results, performance or achievements expressed or implied by such statements. Actual events or results may differ materially from the events or results expressed or implied in any forward-looking statement and deviations are both normal and to be expected. Other than required by law, neither the Company, their officers nor any other person gives any representation, assurance or guarantee that the occurrence of the events expressed or implied in any forward-looking statements will actually occur. You are cautioned not to place undue reliance on those statements.

TENEMENT SCHEDULE

Project	State	Tenement	Status	LCD interest at start of quarter	LCD interest at end of quarter
Murchison Gold Project	WA	E 51/1596	Granted	100%	100%
		E 51/1217	Granted	100%	100%
		M 51/870	Granted	100%	100%
